

## Review of Financial Administration Lupus Europe 2023

### Introduction:

I have conducted a thorough review of the financial administration records of Lupus Europe 2023. The examination focused on verifying the accuracy and completeness of the documentation, particularly concerning invoice processing and recording in the accounting system. This report outlines the findings of the review.

### Findings:

**Dual Authorization:** It was observed that both the treasurer and the chair have been duly authorized to approve payments for invoices. This dual authorization process enhances transparency and accountability within the financial operations of the organization.

### Documentation Integrity:

The examination confirms the integrity of the documentation process. All invoices have been diligently added to the accounting software, ensuring a comprehensive and organized record of financial transactions.

### Conclusion:

Based on the review, the financial administration appears to be effectively managed and compliant with the established procedures. The inclusion of dual authorization and the meticulous documentation of invoices contribute to the overall transparency and reliability of the financial processes.

### Recommendation:

It is recommended that the current practices regarding dual authorization and documentation maintenance continue to be upheld to sustain the integrity of the financial administration. Additionally, periodic reviews should be conducted to ensure ongoing adherence to established protocols and standards.

Should you require any further clarification or additional assistance, please do not hesitate to contact me.
